

Einfache Zählaufgabe

Trage in die Kästchen ein, wie viele Kreise du siehst.

Dann teile die Kreise mit einer Linie in zwei gleich große Gruppen.

A box containing 4 red circles. A dashed vertical line is drawn in the center. There are 2 circles to the left of the line and 2 circles to the right. A small empty rounded square is in the bottom-left corner.

A box containing 6 yellow circles. A dashed vertical line is drawn in the center. There are 3 circles to the left of the line and 3 circles to the right. A small empty rounded square is in the bottom-left corner.

A box containing 10 green circles. A small empty rounded square is in the bottom-left corner.

A box containing 8 blue circles. A small empty rounded square is in the bottom-left corner.

A box containing 4 purple circles. A small empty rounded square is in the bottom-left corner.

A box containing 9 orange circles. A small empty rounded square is in the bottom-left corner.

A box containing 10 teal circles. A small empty rounded square is in the bottom-left corner.

A box containing 10 purple circles. A small empty rounded square is in the bottom-left corner.
